

### **Albireo Energy Qualifies as a NYSERDA RTEM System and Service Provider**

**Edison, New Jersey – February 1, 2017 –** [Building automation](#) and [energy services](#) provider Albireo Energy, LLC (“Albireo Energy”) today announced that the company has qualified for the New York State Energy Research and Development Authority (NYSERDA) Commercial Real Time Energy Management (RTEM) Program. *This qualification allows Albireo Energy to provide RTEM system installation and ongoing service support to building owners and management companies eligible for the program.*

The RTEM program offers financial support to eligible organizations who use technologies to collect data about a building, and utilize that data to optimize the building’s energy usage. Eligible sites include, but are not limited to commercial buildings, educational facilities, non-profit institutions, and government facilities that are located in New York State and are New York State electricity distribution customers of a participating utility company that pays the System Benefits Charge (SBC).

“We are thrilled to be part of the NYSERDA RTEM program,” stated Phil Bomrad, CEO of Albireo Energy. “With the ability to design, install and support RTEM systems we can provide our New York-based clients a one-stop-solution. Albireo’s BEYON-D™ service collects data from building systems, runs algorithms to identify anomalies, and provides recommendations for improvements. These types of RTEM systems identify efficiency measures and help maximize return on investments, while taking advantage of incentives like those offered through the RTEM program.”

In order to participate in the program, the site must select a NYSERDA RTEM qualified vendor, like Albireo Energy, to install and service the RTEM system. NYSERDA will provide financial support for the RTEM system implementation and services for up to five years with the cost share at its highest if the site submits its application by June 30, 2018. For full details about this program, please visit <https://www.nyserdera.ny.gov/All-Programs/Programs/Real-Time-Energy-Management>.

#### **About Albireo Energy**

Albireo Energy provides building automation solutions and energy services to commercial and institutional buildings nationally. Their solutions and services help building owners and managers improve efficiency and reduce operational costs while improving comfort for tenants. Through its operating divisions, AE has a history of providing exceptional solutions to mission critical facilities such as data centers, labs, military installations, and hospitals. Their service portfolio includes energy efficiency, demand response solutions, and smart building solutions including installing and optimizing building automation solutions, electrical power monitoring systems, lighting systems, and fire and life safety technologies.
