

### **Albireo Energy Appoints New Board Member**

**Edison, N.J. – October 3, 2018** – Albireo Energy, LLC (“Albireo Energy”) announced the addition of Rick Einhorn to its Board of Directors.

Rick Einhorn, founding member and managing partner at EYP Mission Critical Facilities, is a proven leader in creating, developing and managing highly profitable, rapidly growing professional service businesses and consulting enterprises, with over 20 years of private and public sector experience. He has been in an executive leadership role in two data center consulting organizations that have gone through acquisitions; one to a global private equity investment company, and the other to a Fortune 50 worldwide technology leader, ultimately serving as WW VP and managing multiple 100M+ global business at the latter.

“Rick is a pioneer in the data center industry and we are excited to welcome him to Albireo Energy’s board of directors,” said Phil Rogers, Albireo Energy’s CEO. “His unparalleled data center expertise and leadership supports the strategic vision to expand Albireo's data center capabilities and service client's mission critical environments. I have no doubt that Rick’s presence will be extremely valuable as Albireo Energy continues to grow.”

“I am very excited about joining the board of this innovative growth player in the building solutions and services industry,” shared Rick Einhorn. “Albireo has an excellent management team executing a smart strategy to increase their presence in the mission critical and data center market. I look forward to assisting in achieving their determined goals in this expanding market.”

#### **About Albireo Energy**

Albireo Energy provides building automation solutions and energy services to commercial and institutional buildings nationally. Their solutions and services help building owners and managers improve efficiency and reduce operational costs while improving comfort for tenants. Through its operating divisions, AE has a history of providing exceptional solutions to mission critical facilities such as data centers, labs, military installations, and hospitals. Their service portfolio includes energy efficiency, demand response, energy procurement services and smart building solutions including building automation installation and optimization, systems integration, metering and lighting.
