Project Manager

Title: Project Manager

Location: Newark, DE

Reports to: Operations Manager

Basic Purpose of Position: This position requires the coordination and delivery of multiple, simultaneous BMS projects of various complexities ranging from \$20K - \$3M, with a total volume up to \$8M. The Project Manager is responsible for the fiscal responsibility of all project facets; including project billing, job cost reporting, and overall customer satisfaction.

Responsibilities:

A key member of the Albireo team, the Project Manager will be responsible for providing the execution for HVAC Building Automation projects, to include:

- Review project specifications, drawings and project specific documents to establish project intent.
- Develop and maintain a project schedule and coordinate needs with the project team. Identify any immediate time sensitive installation needs.
- Assist, as needed, in the pursuit of project specific "Request for Information."
- Assist Operations Manager in the solicitation and contracting of required subcontractors.
- Provide an orientation and provision all necessary project documentation to project technicians. Documents include scope of work, all drawings, applicable specifications, application engineered drawings, project contacts, etc.
- Weekly tracking of resource and project progress and posting.
- Provide documentation of project events that impact the schedule, scope of work, and project efficiency
- Pursue project specific change order opportunities.
-

- Coordinate and pursue project specific billing. Coordinate with Accounting team and Operations Manager (as needed).
- Schedule project specific commissioning resources; and communicate commissioning documentation.
- Expedite the return of project specific mark-ups for As-built development.
- Complete all project specific close-out documentation.

Requirements:

- BSME or BSEE degree preferred.
- 2+ years of engineering, systems or other related experience.
- 5+ years Project Management experience.
- Knowledge and understanding of industry HVAC applications, ability to read and understand MEP drawings and specifications, electrical drawings, network and control wiring diagrams.
- Knowledge of industry standard communication protocols; Ethernet, Modbus, BACnet and Lon
- Proficiency in Microsoft Office and Microsoft Project.
- Strong verbal and written communication; organizational and forecasting skills.
