Internship, Field Services

Title: Field Intern

Location: NY/NJ

Reporting Manager: Operations Manager or Service Manager

Basic Purpose of Position: The Albireo Energy Internship Program prepares college students for a rewarding career in commercial building solutions to include HVAC Building Automation Design, Programming, Installation, Project Management and Sales.

Responsibilities:

The Field Intern will assist Senior System Specialists and Project Supervisors with the execution of HVAC Building Automation projects, to include:

- Performing start up, checking, testing, system diagnostics and commissioning from system-level controllers to end devices for small to medium sized new or retrofit projects.
- Performing preventative and predictive maintenance service activities to ensure optimal performance of system.
- Troubleshooting, diagnosing and repairing and/or replacing control components and controls systems.
- Loading and updating software on network controllers, field controllers, computers and servers.
- Marking up controls submittals to capture field changes and discrepancies for engineering to create As-Builts.
- Conducts extensive self-study (reading, research and practice) to improve and maintain technical proficiency in company's product lines. Completes certifications as required by the company.

Qualifications:

- Current enrollment in a technical school or an associate or bachelor's degree program. Electronics, engineering, mechanical systems, computer technology, air conditioning or similar field preferred.
- Effective interpersonal skills to represent the company to customers and other outside contacts in an ethical and professional manner.
- Valid Driver's license with a clean record.
