System Specialist

Title: System Specialist

Location: Poway, CA

Reports to: Operations Manager

Basic Purpose of Position: Performs point to point check out to verify that controls systems have been installed properly. Completes assigned system commissioning and performs device verification. Troubleshoots and resolves HVAC mechanical, electrical, and controls problems. Properly completes required project documentation. Responds to warranty calls.

Responsibilities:

- Start-up and commission HVAC controls systems.
- Complete all required commissioning documentation.
- Troubleshoots and repairs HVAC mechanical and controls systems.
- Loads system-level controller software.
- Performs commissioning and system diagnostics from system-level controller to end devices.
- Diagnoses and repairs complex control systems malfunctions requiring extensive knowledge of variety of electronic or digital controls systems and ability to test and write modifications in multiple languages of systems software.
- Manages assigned work to meet customer deadlines.
- Reports problems or changes to management immediately.
- Interfaces with field project manager, senior project manager or subcontractors on projects to coordinate activities as required in an ethical and professional manner.
- Trains the customer in control systems operations.
- Delivers manuals and documentation to the customer for training needs as required.
- Compiles job documentation, such as certificate of completion, customer training form, training certificates and punch lists.

- Completes paperwork including but not limited to time sheets, expense reports, and on-site documentation.
- Documents changes and provides information for as-built documentation.
- Provides sketches of field changes and discrepancies for engineering corrections and drawings. May assist with job layouts and bid proposals.
- Trains the customer in control systems operations.
- Conducts extensive self-study (reading, research and practice) to improve and maintain technical proficiency in company's product lines. Completes certifications as required by the company.

Requirements:

- Vocational School graduate or an Associate's degree in electronics, mechanical systems, computer technology, air conditioning or similar field.
- Degree may be offset by two years' experience in servicing electronic and or mechanical systems.
- Five to seven years of increasingly responsible experience in servicing electronic control and HVAC equipment. Ability to coordinate the work of others on multiple job sites.
- Effective interpersonal skills to represent the company to customers and other outside contacts in an ethical and professional manner.
- Possesses the ability to explain technical information to technical and non-technical people.
- Must have experience in writing as well as demonstrated understanding of computer programs and software applications as related to the HVAC Industry.
- Valid driver's license with a clean record.
