Systems Engineer

Title: Systems Engineer

Location: Crofton, MD

Reporting Manager: Commissioning Manager

Basic Purpose of Position: In addition to the responsibilities below, the Systems Engineer will provide expert level technical support; help identify department workflow priorities and serve as a quality assurance/quality control agent for the Commissioning department.

Responsibilities:

A key member of the Albireo team, the Systems Engineer will be responsible to:

- Upgrade systems to the latest versions of automation software;
- Support multiple projects by providing checkout, commissioning and engineering support;
- Provide customer training;
- Mentor in-house technicians;
- Research new products or technologies to meet difficult scope requirements;
- Backfill critical path projects;
- Work within multiple projects to monitor approach and efficiency and recommend corrective actions;
- Analyze BACnet network traffic, identify communication issues, and provide a blueprint for resolution.
- Provide Sales department assistance with presentations and demonstrations.

Qualifications:

- Vocational School or an Associate degree in electronics, mechanical systems, computer technology, air conditioning or similar field is preferred.
- Demonstrated experience with the Automated Logic Product Line and Software Suite.
- Minimum of five years' experience in the HVAC/BAS industry.
- Knowledge of HVAC waterside and airside systems.
- Demonstrated experience with BACnet.
- Working knowledge of IP Networking and Modbus.
- Ability to coordinate the work of others on multiple job sites.
- Effective interpersonal skills to represent the company to customers and other outside contacts in an ethical and professional manner.
- Possess critical thinking skills and an attention to detail.
- Experience in writing as well as demonstrated understanding of computer programs and software applications as related to the HVAC industry.
- Prior experience in a training role is a plus.
