System Specialist

Title: System Specialist II

Location: Crofton, MD; Ashburn, VA

Reporting Manager: Commissioning Manager

Basic Purpose of Position: In addition to the responsibilities below, the System Specialist performs routine technical duties in troubleshooting and repairing of components within building automation field cabinets, sensors, and related controls. This particular role may work under the direct supervision of a higher-level System Specialist. The location of work for this position will primarily be in Northern Virginia.

Responsibilities:

A key member of the Albireo team, the System Specialist will be responsible to:

- Troubleshoot and make necessary repairs to building-automation-system field cabinets, including communication devices, printed circuit boards, power supplies, electrical/electronic controls, sensors, and transducers.
- Take initiative and responsibility for the checkout of end devices, download modules, and assist in bringing networks online
- Identify issues and make minor program and graphic changes
- Communicate technical issues to more senior level technicians
- Assist in safely performing point to point checkout per department standards
- Maintain field markups, and perform warranty related service calls
- Assist with maintaining regular system backups during project.
- Assist more senior level technicians in the startup of systems and equipment
- Report to work on time and ready to perform assigned tasks
- Maintain company tools, test equipment, and material
- Create daily reports and submit to EMS project team and supervisor
- Stay busy and looks for opportunities to keep the project moving forward
- Communicate with jobsite personnel from other trades to complete project objectives

- Be comfortable in using/navigating the company's building automation suite and offerings

Qualifications:

- Equivalent experience, vocational school, or an Associate degree in electronics, mechanical systems, computer technology, air conditioning or similar field is preferred.
- 2-4 years' experience in servicing controls and HVAC equipment.
- Familiarity with the Automated Logic product line and software suite is a plus.
- Experience in high-availability environments like hospitals and datacenters is another plus.
- Ability to learn and retain training content assigned to them.
- Ability to learn and retain concepts related to job assignments
- Positive attitude
- Inquisitive
- Intuitive
- Strong communication skills
- Strong writing skills
- Self-starter
- Shows ability to plan and prepare for tasks assigned to them
